Election/Restriction

I. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-4, 5-8, 9-14 drawn to a broadcast transmission medium coupling a head end to a plurality of clients, the medium including an alert management message therein , classified in class 709, subclass 223.

II. Claims 15-20, drawn to in a method of receiving an alert management message transmitted to a plurality of recipients on a broadcast channel, classified in class 709, subclass 207.

II. The inventions are distinct, each from the other because of the following reasons Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a broadcast transmission medium coupling a head end to a plurality of clients; and transmitting the data . invention II has separate utility such as in a the alert management message when the recipient is not a target recipient; and to recover the alert management message when the recipient is a target recipient. See MPEP. § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Art Unit: 2142

5. During a telephone conversation with Scott C. Harris, attorney, on 3/23/04 to request an oral election to the above restriction requirement, but did not result in an election being made.
